Federico Aguirre

Full-Stack Web Developer • Systems Analyst

fede.dev3@gmail.com • [LinkedIn Link] • [GitHub Link] • [Portfolio Link]

Systems Analyst specializing in Full-Stack Web Development (React, Next.js, Laravel). Focused on engineering responsive, scalable web applications while adhering to software engineering best practices (SOLID, KISS, DRY). Strong analytical mindset, clear technical communication skills developed through teaching experience, and proven autonomous problem-solving capabilities across production-deployed projects.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, PHP, Java, React.js, React Native, Next.js, Node.js, Express, Laravel, HTML5, CSS3, Tailwind CSS.
- **Testing & Quality Assurance:** Vitest, Playwright (E2E), Storybook, PHPUnit, Laravel Dusk.
- **State Management & Real-Time:** Redux, Zustand, WebSockets (Socket.IO).
- **Databases & Backend:** MySQL, PostgreSQL, SQL, MongoDB, GraphQL, Firebase, Supabase.
- **Tools & Deployment:** Git, GitHub, Docker, Postman, WordPress, AWS, Vercel, Render, Neon, Aiven.
- **Languages:** Spanish (Native), English (Advanced / C1).

FEATURED PROJECTS

Full-Stack E-Commerce (Next.js) • [Website Link] • [GitHub Link]

- **Architecture & Frontend:** SEO-optimized platform built with Next.js (App Router), React 19, Server Components, and global state management using Zustand.
- **Backend & Payments:** GraphQL API over PostgreSQL (Prisma / Aiven), secure authentication powered by NextAuth, and payment gateway integration via Mercado Pago SDK.
- **Testing & Quality:** Comprehensive unit test coverage using Vitest and automated E2E testing with Playwright (implementing the Page Object Model pattern).

Real-Time Chat App (React.js) • [Website Link] • [GitHub Link]

- **Architecture & Real-Time:** Engineered a distributed Full-Stack application (Vercel + Render + MongoDB Atlas) featuring real-time bidirectional communication via Socket.IO for direct messaging and group channels.
- **Security & Data:** Implemented hybrid authentication using JWT and Google OAuth 2.0, optimizing contact management in MongoDB with atomic operations ($addToSet, $pull) to ensure data consistency.
- **Frontend & Media:** Designed a responsive SPA interface using React 19, TypeScript, Redux Toolkit, and Tailwind CSS v4, incorporating efficient media uploads and storage via Cloudinary.

Full-Stack E-Commerce (Laravel) • [Website Link] • [GitHub Link]

- **Architecture & Payments:** E-Commerce platform built using the TALL Stack (Tailwind, Alpine, Laravel, Livewire), featuring PayPal SDK integration and OAuth 2.0 social login via Laravel Socialite.
- **Booking System & DB:** Dynamic appointment scheduling system utilizing Flatpickr, Alpine.js, and a PostgreSQL database hosted on Neon DB.
- **DevOps & Quality:** Containerized the application environment using Docker and established automated unit testing with PHPUnit alongside E2E testing with Laravel Dusk.

WORK EXPERIENCE

Computer Science Instructor School No. 9 DE 3 (11/2025 – 03/2026) • School No. 27 DE 4 (06/2026 – 08/2026)

- Taught core programming logic, algorithms, and web development.
- Designed instructional materials, hands-on coding exercises, and evaluated students' technical projects.

EDUCATION & CERTIFICATIONS • [Credentials Link]

Systems Analyst (Associate Degree) • Instituto de Formación Técnica Superior N° 12 (03/2020 - 11/2024)
Full-Stack Web Developer • Codo a Codo (06/2021 - 11/2021)
